# **PVC Profiles**

*"It's the lengths we go to"*

**TECH PLAS**  
EXTRUSIONS

For over twenty years TechPlas has been a leading manufacturer of PVC profiles designed for tough Australian conditions.

Our vision is to be the best extrusion manufacturer in Australia. We employ the latest technology, we practice world's best procedures and we are determined to deliver the right product at the agreed time.

Creating the perfect die, in-house, is the key to our extrusion process.

Our formulations are proven in the harsh UV conditions of Australia, providing the right flexibility, strength and surface finish in up to 700 colours.

Customers include leading traffic management supply companies, civil engineering and government users.

#### **PVC-U (Polyvinyl Chloride, Unplasticized)**

PVC-U has excellent chemical resistance across its operating temperature range. Due to its long term strength characteristics and cost effectiveness, PVC-U systems account for a large proportion of plastic profiles in building and industrial installations. PVC-U is resistant to most solutions of acids, alkalis, salts and organic compounds miscible with water.

#### **Barrier Boards**

Our uPVC barrier board profile has been a favourite with leading traffic management supply and hire companies for years.

- Lightweight
- Tough
- Long life
- UV stabilised
- Re-Painting not required

Available in Black or Yellow.  
Standard length 2.5 mtrs  
Width 190mm  
Thickness 25mm

#### **Guide Posts**

uPVC guide posts offer significant advantages over steel and timber posts.

- Re-cyclable
- Lightweight
- Tough
- Long life- UV stabilised
- Re-Painting not required
- Less injury risk from impact

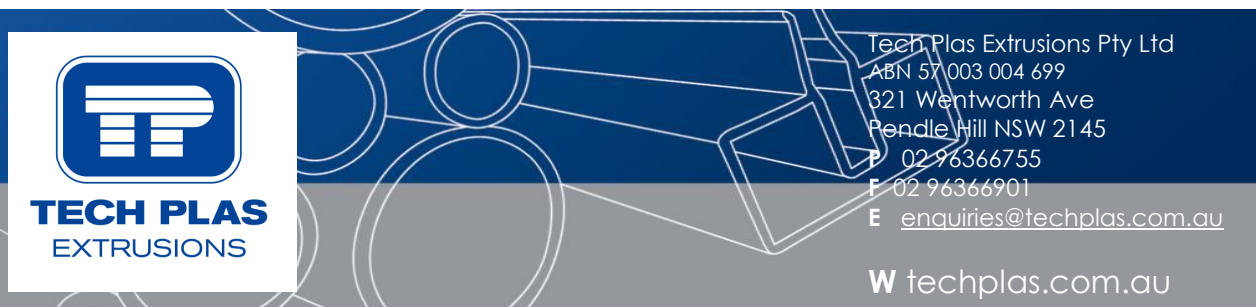

Available in White.  
Standard length 1.35 mtrs  
Width 100mm  
Thickness 2.5mm

#### **Eureka Posts**

Plastic star pickets never rust or rot and can be driven with a standard rammer.

- High visibility
- Long life- UV stabilised
- Re-Painting not required
- Less injury risk from impact

Available in White or Orange.  
Standard length 1.8 mtrs
