

Environmental Policy PVC Stewardship Program

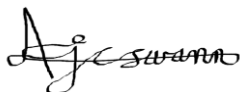

Environmental Policy

Tech Plas Extrusions Pty Ltd is a producer of extruded plastic products made from PVC, PP and varied engineered polymers in NSW.

As a Signatory to the Australia PVC Stewardship Program, administered by the Vinyl Council of Australia, *Tech Plas Extrusions Pty Ltd* is committed to minimise potential environmental impact and continually improve operations while working in compliance with the principles and commitments of the PVC Stewardship Program as well as all relevant environmental legislations, regulations and planning policies.

Tech Plas Extrusions Pty Ltd commit to:

- Integrate the considerations of the PVC Stewardship Program commitments into our decision making and day to day activities
- Improve efficiency of operations to minimise water and raw material use, energy consumption, waste and pollution generation; in particular to:
 - *Increasing overall profile production utilizing recycled PVC materials*
 - *Minimise the volume of plastic pellets and powder entering water streams*
 - *Upgrading aging machines and components to decrease electricity and water usage*
- Work to achieve the environmental expectations of our staff, customers, suppliers and local community.
- Apply best practice standards for environmental management.
- Create awareness among our staff and suppliers of the potential environmental effect of operations with which they are involved, and how they can work towards minimising these environmental effects.
- Communicate our environmental commitments to clients, customers and the public and encourage them to support it
- Continue to conduct regular assessments of the environmental effects of our business to identify potential areas for improvement, and to follow through with programs to achieve these improvements.
