

FEATURED PROJECT

Civil Tunnel Project WA

TechBoard is 25% lighter than timber based, LVL alternative scaffold planks

60% greater underfoot grip than required by AS/NZS 1577:2013

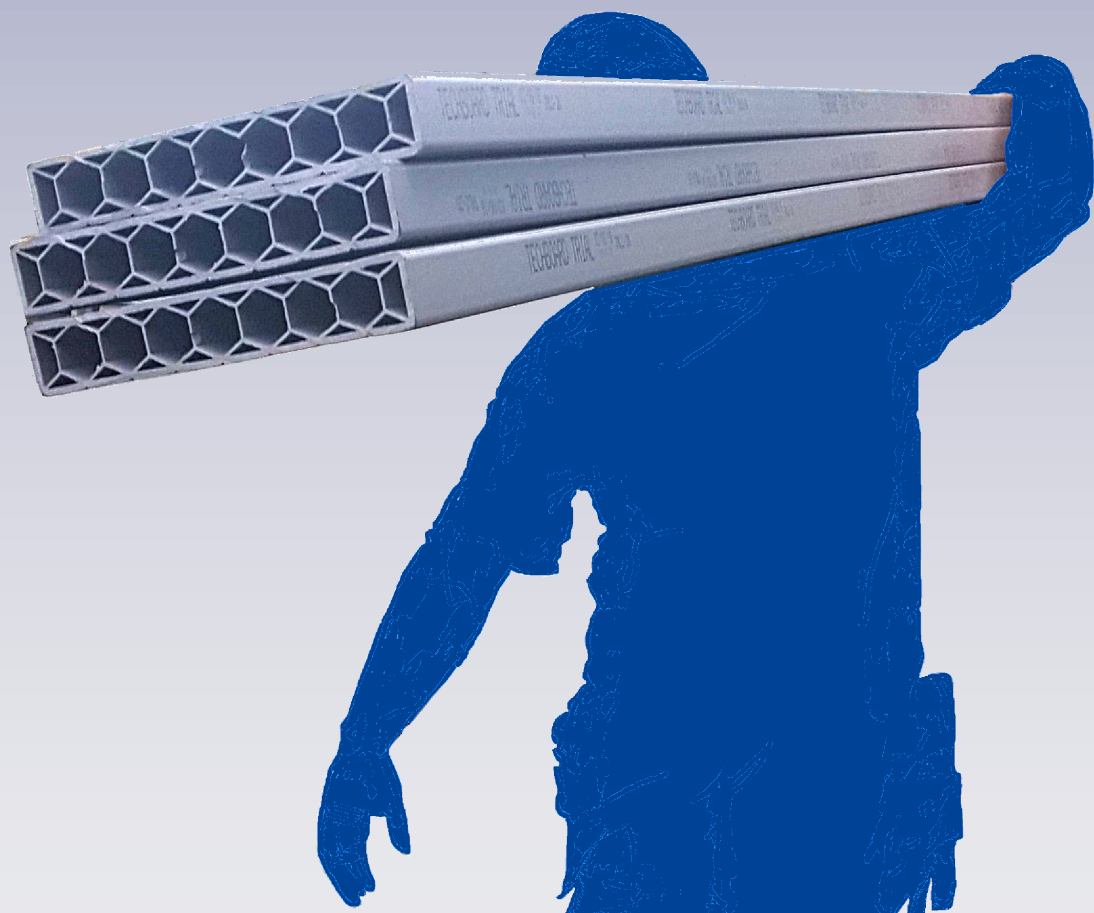

TechBoard utilised on a hazardous, over water tube and clip project for major road developments in WA.

The TechBoards are significantly longer lasting than timber based alternatives—more so when used in moist environments.

The many safety benefits of the TechBoard assisted in ensuring that this project followed AEG's **STEER** strategy :

Strive To Eliminate Every Risk
