

FEATURED PROJECT

NZ Dairy Maintenance

TechBoard polymer based planks present an ideal solution for maintenance in **hygiene sensitive areas** such as dairies. In an environment where the client has banned the use of timber based products the TechBoard integrates perfectly with tube and clip.

The TechBoard is **non-contaminable**, easily cleaned (**sterilized**) and resistant to processing chemicals such as **acids and caustics**. Additionally the planks are **25% lighter** than the LVL alternative and have **supreme grip underfoot**, making them safer and easier to install for work at heights.

Being **AQIS exempt** the TechBoard was easily shipped in container loads to NZ.
